Abstract

The Export Control Handbook for Chemicals (2023 edition) contains a detailed mapping of chemicals, around 2000, subject to export controls (restrictions, or prohibitions under sanctions) because of their inclusion in various EU regulations, or the Chemical Weapons Convention treaty. Each chemical is correlated with other data of interest, besides its chemical name: CAS number, control reference codes, EU legislation of reference and the 8-digits-code Combined Nomenclature code (CN code) used for declaration purposes at Customs.

All together, the handbook helps the users to improve their export compliance by limiting the risk of mistakes and penalties by orienting themselves within the following collection of export regulations in force:

- Dual-use regulation, (EU) No 2021/821
- The Chemical Weapons Convention (International treaty)
- Chemicals with military applications, 2008/944/CFSP
- Hazardous chemicals, (EU) No 649/2012
- Chemicals included in the anti-torture regulation, (EU) No 2019/125
- Chemicals subject to sanctions for certain countries (Russia, Syria, DPRK and Iran)
- Chemical precursors of explosives, (EU) No 2019/1148
- Chemical precursors of psychotropic and narcotic substances, (EC) No 111/2005

Another important application of the handbook include facilitating authorities to identify sensitive transactions.

The handbook's online version includes links to the correlation tables where users can download files in Excel format from the JRC Data Catalogue: <https://data.jrc.ec.europa.eu/collection/id-00344>

Acknowledgements

This third revision was produced following the remarkable success of the first two editions of the handbook, also with a view to make it even more useful by updating the information and adding more regulations foreseeing different forms of export controls on chemicals.

Although this handbook contains around 2000 chemicals, the fact that a chemical is not present in this handbook does not imply that is not under the scope of any export regulations. The handbook is meant to be a helpful guide, but its users are always due to consult the primary legislation and follow its requirements.

The tables are produced with the best possible expertise, but of course feedback, comments and corrections are welcome. Contact email: jrc-strike@ec.europa.eu

Authors

Dr. Xavier ARNES-NOVAU is an expert in chemicals, dual-use export control regulations and classification and coding of goods, originally working at Spanish Customs and several various years of experience at the European Commission Joint Research Centre¹, with key contributions and responsibility in providing technical and scientific support to the implementation of the EU Strategic Trade Control (STC) framework.

Dr. Filippo SEVINI is an expert in dual-use export controls, nuclear technology, security and safeguards in charge of the Strategic Trade Control Implementation and Geopolitical issues activities for research, policy support and cooperation at the European Commission Joint Research Centre⁽¹⁾.

1 Introduction

Chemicals play a key role in our lives but if mishandled may also pose threats to health and security of the citizens. Many chemicals of daily industrial or personal use are also precursors of chemical weapons, or explosives.

The Handbook (2023 edition) is a revision of the two previous ones (2019 and 2021) that incorporates more chemicals and references linked the restrictive measures against Russia, plus some dual-use chemicals not expressly mentioned in the control list, and changes on the Combined Nomenclature due to the entry into force of the 2022 Harmonized System.

This handbook contains a list of around 2000 chemicals subject to export controls (restrictions, or prohibitions under sanctions) because of their inclusion in various EU regulations or the Chemical Weapons Convention treaty. Each chemical is correlated with other data of interest, besides its chemical name: CAS number, reference codes, EU legislation of reference and the 8-digits-code used for Customs declaration purposes, 376 different CN codes in total.

Figure 1. Chemicals included in this handbook

*Note that there are overlaps of same chemicals within regulations/treaties

The online version includes links to the tables where users can download files in Excel format from the JRC Data Catalogue: <https://data.jrc.ec.europa.eu/collection/id-00344>

1.1 Why this handbook?

All together, the handbook allows its users to orient themselves among the collection of export regulations in force, limiting the risk of mistakes and penalties.

The beneficiaries of this handbook are mainly two communities:

- A) Economic Operators (exporters) in the chemical sector, including researchers, for whom the handbook is a tool helpful to identify those chemical subject to export controls, supporting compliance with the EU regulations.
- B) Member States customs officers for control/investigation/enforcement purposes: the handbook is a very useful tool to know which chemicals require an authorisation for export purposes and therefore it allows the detection of possible violations of the EU export regulations by targeted trade analysis.

The exporters of dual-use goods (including chemical precursors, propellants, etc.) are industrial manufacturers and suppliers, as well as research institutes and academia. The latter may in particular export “knowledge”, such as technical information, data and know-how of processes, in addition to actual goods such as chemicals and their compounds.

Compliance with this complex framework is called for by the guidelines of the international export control regimes, as well as the EU Recommendation on internal compliance programmes for dual-use trade controls in 2019⁽²⁾ which was followed in 2021 by the EU guidelines for export compliance of dual-use research⁽³⁾.

Compliance with the regulations can be supported also by tools and databases like this handbook, which identifies all those chemicals subject to export controls (from different regulations and from different DGs) and works as a single control reference integrated list that allows having the whole picture of export controls on chemicals.

The handbook is therefore a valuable tool for helping exporters to follow the necessary procedures, protecting citizens from unauthorised exports, while at the same time safeguarding EU competitiveness, preventing reputational losses and financial penalties to the economic operators, or worse consequences.

With this handbook, the authorities may benefit of the collection of information and easy to navigate summary of codes to swiftly search through the chemicals and verify what kind of authorisations they might require, that will be described in the following sections:

- 2.1 EU Dual-use regulation
- 2.2 The Chemical Weapons Convention (International treaty)
- 2.3 Chemicals with military applications
- 2.4 Hazardous chemicals (PIC regulation)
- 2.5 Chemicals included in the anti-torture regulation
- 2.6 Chemicals subject to sanctions for certain countries (Russia, Syria, DPRK and Iran)
- 2.7 Chemical precursors of explosives
- 2.8 Chemical precursors of psychotropic and narcotic substances

Different authorities in each Member State are in charge of the various areas of export authorisation, but a significant portion may be pertinent to the same authorities in charge of dual-use, military exports, as well as the new Foreign Direct Investment screening (FDI)⁽⁴⁾. The latter is the object of a recent EU regulation with an associated risk analysis and decision process. Also for this, the authorisation to the acquisition of an EU industrial asset by a third country could be informed by the quick identification of the dual-use sensitive nature of the chemical production and associated patents.

1.2 Structure of the handbook

The chemicals contained in the handbook are collected on the basis of the applicable EU regulations controlling them, as well as the Chemical Weapons Convention's schedules.

Each listed chemical is identified by its chemical name (which may not be scientifically unique and of course varies in the different languages) and two other relevant data, very useful to the actors involved in export controls:

- The CAS number, a unique numerical identifier for chemicals, and
- The Combined Nomenclature's 8-digit-code (CN) used for Customs declaration purposes.

For each listed chemical, its triple identification set (chemical name; CAS number; Combined Nomenclature code) is then put in correspondence with the reference control code of each regulation considered, as we will see in chapter 2.

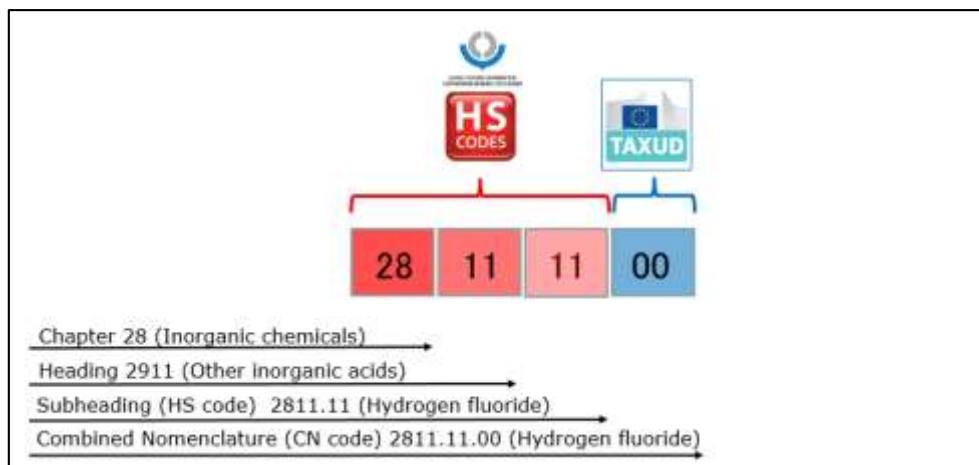

1.3 The Combined Nomenclature

The Combined Nomenclature (CN) is an annually amended customs system established on the basis of the Harmonized System. Each traded commodity, including chemicals, is identified by an 8 digit-CN code used in the Single Administrative Document (SAD) for Customs declaration purposes

The eight digits of CN codes are defined as follows:

- (a) the first six digits shall be the code numbers relating to the headings and subheadings of the Harmonized System (HS) nomenclature;
- (b) the seventh and eighth digits shall identify the CN subheadings.

Figure 2. Combined Nomenclature (example on hydrogen fluoride)

The assignment of the CN codes to each commodity has been decided taking into account the rules of classification included in the Common Customs Tariff⁽⁵⁾ and using the CN codes of the latest version of the Combined nomenclature, 2023, as a reference⁽⁶⁾.

⁽⁵⁾ Commission Implementing Regulation (EU) 2022/1998 of 20 September 2022 amending Annex I to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff

⁽⁶⁾ Commission Implementing Regulation (EU) no 2020/1369 of 29 September 2020 amending Annex I to Council Regulation (EEC) No 2658/87 on the tariff and statistical nomenclature and on the Common Customs Tariff.
<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=celex%3A32020R1369>

Chemicals and chemical products are listed in the Section VI of the Harmonized System (Products of the Chemical or Allied Industries). There are 11 chapters related to chemicals and chemical products (from chapters 28 to 38). However, chemicals included in this handbook are usually of concern due to their high purity and, therefore the chapters of interest are mainly Chapter 28 for inorganic chemicals and Chapter 29 for organic chemicals (see figure 3).

Other chemicals included in this handbook concern some mixtures of chemicals, named as Miscellaneous chemical products (Chapter 38), as well as a minor amount of metals in powder form (e.g. chapters 57 or 81), not included in the figure 3 below.

The European Commission, DG TAXUD, has published a very useful tool called ECICS (European Customs Inventory of Chemical Substances), which allows to obtain the CN code of either organic or inorganic chemicals, from their CAS number. ECICS⁽⁷⁾ lists chemical names in a number of EU languages (currently mainly eleven) along with their tariff classification in the European Community's Combined Nomenclature (eight-digit CN codes).

Figure 3. Classification of chemical goods in the Common Customs Tariff

1.4 Chemical Abstracts Service (CAS)

The CAS registry number⁽⁸⁾, or CAS number, is a unique numerical identifier assigned by the Chemical Abstracts Service (CAS) to every chemical substance described in the open scientific literature, including organic and inorganic compounds, minerals, isotopes and alloys.

The CAS number contains up to 10 digits, divided by hyphens into three parts, with the right most one being a check digit (see figure 4). Regardless how a chemical is named in any language, the CAS number remains always the same and therefore it is very useful for an unequivocally identification.

Figure 4. CAS number structure (example arsenic trichloride)

2 Export control regulations in force in the EU

The EU controls the exports of strategic goods by Regulation (EU) No 2021/821 (⁹) and amendments, including the EU dual-use control list (Annex I) updated annually as European Commission Delegated Act.. The regulation, implemented by the Member States and monitored by the European Commission as part of the EU common commercial policy, stems from EU and MS legal and political international commitments, like UNSCR 1540, the Nuclear Non-Proliferation Treaty (¹⁰), the Chemical Weapons Convention (¹¹) – an international treaty with control schedules - and the international export control regimes (¹²), which all include chemical items, in particular the Australia Group (¹³).

Sanctions measures targeting specific countries also control or prohibit dual-use and other strategic goods, including chemicals. Similarly, the EU Common Military Control List (¹⁴) includes large sets of goods and in particular chemicals.

The export of chemicals and the technology for their production are included also in other regulations targeting anti-torture, explosives and drugs precursors.

In addition, hazardous chemicals that entail high risk due to its toxicity for human beings, animals, plants or the environment are also subject to export controls under the so called PIC (Prior Informed Consent) regulation.

The resulting collection of references included in the handbook is the following:

- Dual-use regulation, (EU) No 2021/821 (⁸)
 - The Chemical Weapons Convention (¹⁰)
 - Chemicals with military applications, 2008/944/CFSP (¹³)
 - Hazardous chemicals, (EU) No 649/2012 (¹⁵)
 - Chemicals included in the anti-torture regulation, (EU) No 2019/125 (¹⁶)
 - Chemicals subject to sanctions for certain countries (Syria, DPRK and Iran)
 - Chemical precursors of explosives, (EU) No 2019/1148 (¹⁷)
 - Chemical precursors of psychotropic and narcotic substances (EC) No 111/2005 (¹⁸)
-

2.1 Dual-use goods

Regulation (EU) No 2021/821 controls the export of dual-use items which can assist the production of Weapons of Mass Destruction (WMD), including certain chemicals which may be used as precursors for toxic chemical agents, included in Annex I of the regulation, also known as the EU dual-use control list. Annex I is amended annually by a Commission Delegated Regulation on the basis of the international export control regimes' decisions and its latest version was published in January 2023: (EU) No 2023/66 (¹⁹).

Strategic, or "dual-use" goods have both civil and military applications, including systems, equipment, components, materials, software and technologies for manufacturing, aerospace, electronics, chemical, biological and medical, nuclear, telecommunications, cyber-security, marine, navigation, avionics, laser applications, energy production and many other applications. They include dual-use materials, systems, equipment, technologies and software play in the proliferation of nuclear, chemical, biological weapons, of missiles and means of delivery, of related materials and technologies, including cyber-threats.

Effective trade controls depend to a great extent on the awareness of exporters and their active efforts to comply with trade restrictions. To this end, companies usually put in place a set of internal policies and procedures, also known as an Internal Compliance Programme (ICP). The EU published a guidance, (EU) No 2019/1318 (²⁰) that provides a framework to help exporters identify, manage and mitigate risks associated with dual-use trade controls and to ensure compliance with the relevant EU and national laws and regulations.

The codification system used for the identification of dual-use items in general, including chemicals, was established as an alpha-numeric code called Export Control Number (ECN) made of 5 characters. The first character is a 0-9 digit corresponding to the category (10 in total), the second is a letter (A to E) which refers to the subcategory, while the third character (0-4) identifies the Multilateral Export Control Regime (see table 1).

(¹⁹) Commission Delegated Regulation (EU) 2023/66 of 21 October 2022 amending Regulation (EU) 2021/821 of the European Parliament and of the Council as regards the list of dual-use items.
<http://data.europa.eu/eli/reg/del/2023/66/oj>

(²⁰) Commission Recommendation (EU) 2019/1318 of 30 July 2019 on internal compliance programmes for dual-use trade controls under Council Regulation (EC) No 428/2009
<https://eur-lex.europa.eu/legal-content/EN/TXT/?uri=CELEX%3A32019H1318>

Table 1. Dual-use codification system

Category	Subcategory	Export Control Regime	Codification
0=Nuclear materials	A=Systems, equipment and components B=test, inspection and production equipment C=materials D=software E=technology	0=Wassenaar arrangement (WA) 1=Missile Technology Control Regime (MTCR) 2=Nuclear Suppliers Group 3=Australia Group 4=Chemical Weapons Convention (CWC)	two more digits to identify each item. Sub-bullets, letters and numbers could follow for further subdivision
1=Special materials			
2=Materials processing			
3=Electronics			
4=Computers			
5=telecommunications and information security			
6=Sensors and lasers			
7=Navigation and avionics			
8=Marine			
9=Aerospace and population			

For what concerns the 10 categories into which the EU dual-use control list is divided, most of the chemicals are classified into Category 1 (Special materials), and in less common occurrence into Category 0 for nuclear fuel cycle-related materials, or Category 6 for certain chemicals with good optical properties.

The sub-categories, indicated by the A-E letters in second position, correspond to the type of item (for example, C corresponds to materials, which is the type of item listed in our handbook).

The third digit identifies the Multilateral Export Control Regime pursuant to which the item is controlled, as explained in table 1 and illustrated in figure 5:

- Number 0 refers to the Wassenaar Arrangement (WA) which for instance controls certain chemicals used as lubricating materials (1C006).
- Number 1 is associated to the Missile Technology Control Regime (MTCR) which includes for example propellants (1C111);
- Number 2 relates to the Nuclear Suppliers Group (NSG) which controls, for example, Tritium (1C235).
- Number 3 points at the Australia Group, the regime that looks into the chemical precursors to toxic chemicals used as chemical weapons (1C350).
- Number 4 corresponds to those chemicals already under the scope of the Chemical Weapons Convention (1C450).

Figure 5. Description of Export Control Number (ECN) codes

2.2 Chemical Weapons Convention

The Chemical Weapons Convention (CWC) is an arms control treaty of 1993, entered into force in 1997, that outlaws the production, stockpiling, and use of chemical weapons and their precursors and it is administered by the Organisation for the Prohibition of Chemical Weapons (OPCW).

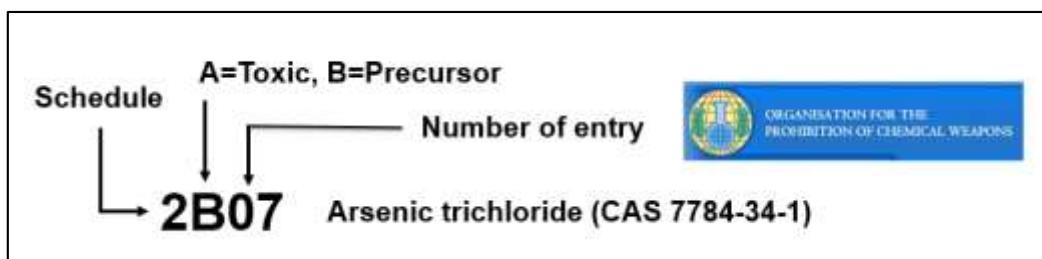

The chemicals of concern are organised to reflect the risk posed by the chemical to the objectives of the Convention, with decreasing risk across the schedules

- Schedule 1 covers chemicals that possess lethal or incapacitating toxicity and other properties that would enable it to be used as a chemical weapon (Schedule 1A), and their final stage precursors (Schedule 1B). They pose a high risk to the objectives of the Convention and have little or no commercial application (²¹).
- Schedule 2 covers chemicals which are potential chemical warfare agents (Schedule 2A), and other chemical weapons precursors (Schedule 2B). They pose a significant risk to the objectives of the Convention and have moderate level of commercial application (²²).
- Schedule 3 covers chemicals which had previously been produced, stockpiled or used as a chemical weapon. They pose a risk to the objectives of the Convention by virtue of its importance in the production of one or more chemicals listed in Schedule 1 or Schedule 2B. Schedule 3 chemicals have widespread commercial application (²³).

The Schedules of the CWC have only been modified once since the treaty entered in force in 1997. The modification was adopted in November 2019 with the inclusion of 4 new families of toxic chemicals to the Schedule 1, some of them related to the family of Novichok chemicals.

The CWC classifies chemicals by Schedules but also according to their role either as a toxic chemical (identified with an A) or a chemical precursor (identifies with a B), see figure 6.

Figure 6. Codification of chemicals used by the CWC

The OPCW makes available a Declarations Handbook (²⁴) that serves as guidance for the preparation of declarations to be submitted by States Parties in accordance with the requirements of the Convention. The Declarations Handbook is a nonbinding document which provides practical support to States Parties on how to report the information on declarable facilities and activities, including exports, thereby ensuring that these are effectively brought under the purview of the Convention's verification regime.

2.3 Common Military List

On 13 March 2020, the Official Journal of the European Union published the latest version of the Common Military List of the European Union, updating and replacing the Common Military List of the European Union adopted by the Council.⁽²⁵⁾ The list updates and replaces the previous versions and describes equipment, including a large amount of chemicals, governed by the common rules of the control of exports of military technology and equipment included in the Council Common Position 2008/944/CFSP.

Effective trade controls depend to a great extent on the awareness of exporters and their active efforts to comply with trade restrictions. To this end, in September 2019 the Council of the EU published an user's guide⁽²⁶⁾, that provides a framework to help exporters identify, manage and mitigate risks associated with the export of military items to ensure compliance with the relevant EU and national laws and regulations.

Items included in the military list are classified in 22 categories based on their type and/or application, being the chemicals classified in categories ML7 (toxics) and ML8 (energetic materials), see table 4 below.

Table 4. Codification of military items

Category	Subdivision	Numeric code
ML1= Smooth-bore weapons with a calibre of less than 20 mm	a,b,c,d, etc.	1 or 2 digits
ML2=Smooth-bore weapons with a calibre of 20 mm or more		
ML3= Ammunition and fuze setting devices		
ML4= Bombs, torpedoes, rockets, missiles, other explosive devices		
ML5= Fire control, and related alerting and warning equipment		
ML6= Ground vehicles and components		
ML7= Chemical or biological toxic agents, 'riot control agents', radioactive materials, related equipment		
ML8= 'Energetic materials', and related substances		
ML9= Vessels of war		
ML10, ML11, ..., ML22

2.4 Hazardous chemicals (PIC regulation)

The Regulation (EU) No 649/2012 (²⁷) also known as Prior Informed Consent (PIC) Regulation, is the regulation of the European Parliament and of the Council concerning the export and import of hazardous chemicals. It applies to industrial chemicals and pesticides (including biocides) that are banned or severely restricted for health or environmental reasons. It places obligations on companies that wish to export these chemicals to non-EU countries. The PIC Regulation implements within the EU the Rotterdam Convention (²⁸) on the Prior Informed Consent procedure for certain Hazardous Chemicals and Pesticides in international trade.

The PIC Regulation entered into operation on 1 March 2014. From this date, the European Chemicals Agency (ECHA) (²⁹) is responsible for the administrative and technical tasks related to the new Regulation.

The PIC Regulation covers the following chemicals:

- Certain hazardous chemicals that are subject to the prior informed consent procedure under the Convention (the 'PIC procedure');
- Certain hazardous chemicals that are banned or severely restricted within the Union or a Member State;
- Chemicals when exported in so far as their classification, labelling and packaging are concerned.

The regulation differentiates chemicals in two annexes, Annex I (restricted) and Annex V (prohibited), but in its turn Annex I is split in three parts (see table 6).

Table 6. Description of PIC annexes

Annex	Description
Annex I Part 1	Chemicals banned or severely restricted within the EU in a subcategory of a Convention use category
Annex I Part 2	Chemicals banned or severely restricted within the EU in a Convention use category
Annex I Part 3	Chemicals that are subject to the prior informed consent (PIC) procedure under the Rotterdam Convention
Annex V	Chemicals prohibited within the EU and banned from export

The European Chemicals Agency published a guidance (³⁰) with the aim of assisting, providing assistance and technical and scientific guidance to industry, economic operators and authorities on complying with their obligations under the Regulation (EU) No 649/2012 (the PIC Regulation).

2.5 Anti-torture regulation

Torture means any act by which severe pain or suffering, whether physical or mental, is intentionally inflicted on a person for such purposes as obtaining from that person or from a third person information or a confession, punishing that person for an act that either that person or a third person has committed or is suspected of having committed, or intimidating or coercing that person or a third person, or for any reason based on discrimination of any kind, when such pain or suffering is inflicted either by or at the instigation of, or with the consent or acquiescence of, a public official or other person acting in an official capacity.

The EU regulation aimed to control the export of such items is the Regulation (EU) No 2019/125 (⁽³¹⁾) of the European Parliament and of the Council of 16 January 2019 concerning trade in certain goods which could be used for capital punishment, torture or other cruel, inhuman or degrading treatment or punishment, including chemicals which are listed below in the following table 8.

Table 8. Description of anti-torture annexes

Annex	Description
Annex III	Annex III lists goods that have some practical use other than for the purpose of torture or other cruel, inhuman or degrading treatment or punishment. Exports of any of the goods listed in Annex III of the Regulation generally require authorisation.
Annex IV	It specifies goods which could be used for the execution of human beings. An export authorisation is required for the goods listed in Annex IV of the Regulation.

In 2019 the Council of the EU published Guidelines (⁽³²⁾) with the aim of providing practical guidance to EU institutions and Member States, that can be used in their engagement with third countries as well as in multilateral human rights fora, to support ongoing efforts to eradicate torture and other ill-treatment worldwide.

2.6 Sanctions and embargoes

Restrictive measures (sanctions) are an essential tool in the EU's Common Foreign and Security Policy (CFSP), through which the EU can intervene where necessary to prevent conflict or respond to emerging or current crises. The EU has over forty different sanctions regimes in place. Some are mandated by the United Nations Security Council, whereas others are adopted autonomously by the EU, and some of them include chemicals because it was evidenced that they were used in a chemical/nuclear weapons program, or in long range missiles program.

- Syria: Chemicals whose sale, supply, transfer or export to Syria is restricted were first listed in annexes to Council Regulation (EU) No 36/2012 (⁽³³⁾). Later on, there were relevant amendments like the (EU) No 509/2012 (⁽³⁴⁾) and (EU) 697/2013 (⁽³⁵⁾). Annexes I, VI and IX to the consolidated version of the regulation (EU) No 36/2012 contain those chemicals subject to a prior authorisation for export, whereas there is a total ban for those chemicals included in control list to the dual-use regulation (see table 10)
- Iran: The consolidated version of the regulation (EU) No 2016/1375 (⁽³⁶⁾) governs the export control of strategic items to Iran, some of which are chemicals (see table 11).
- DPRK: The consolidated version of the regulation (EU) No 2017/1509 (⁽³⁷⁾) governs the export control of strategic items to the Democratic Popular Republic of Korea, some of which are chemicals (see table 12).
- Russia: The consolidated version of the regulation (EU) No 833/2014 (⁽³⁸⁾) governs the export control of dual-use items and advanced technology items to Russia, in view of the Russia's actions destabilising the situation in Ukraine. In 2014 it was banned the export of dual-use items to military end-users in Russia. Lately, on the 25th of February 2022 the restriction was extended to all end-users in Russia, plus the creation of a new annex for Advanced Technology items (Annex VII), which included more chemicals in addition to the ones covered by the Annex I to the dual-use regulation (EU) 2021/821. In addition Annex XXIII includes other chemicals which could contribute to the enhancement of Russian industrial capacities (see table 13).

Table 11. Chemicals subject to the restrictive measures against Iran, (EU) No 267/2012

(*in bold new chemicals or new CN codes)

Reference	Chemical name	CAS number	CN code
II.A1.001 (Iran)	Bis(2-ethylhexyl) phosphoric acid	298-07-7	2919.90.00
II.A1.002 (Iran)	Fluorine; F ₂	7782-41-4	2801.30.10
II.A1.015 (Iran)	Tributyl phosphate; TBP	126-73-8	2919.90.00
Annex III (Iran)	1,1'-Diacetyl ferrocene	1273-94-5	2931.90.00
Annex III (Iran)	1,1-Diethylhydrazine nitrate; DEHN	N/A	2928.00.90
Annex III (Iran)	1,1-Dimethylhydrazinium azide	227955-52-4	2928.00.90
Annex III (Iran)	1,1'-Ferrocenedicarboxylic acid	1293-87-4	2931.90.00
Annex III (Iran)	1,2-Diethylhydrazine nitrate; DEHN	36453-17-2	2928.00.90
Annex III (Iran)	1,2-dimethyladamantane	702-79-4	2902.19.00
Annex III (Iran)	1,2-Dimethylaminoethylazide; DMAZ	86147-04-8	2928.00.90
Annex III (Iran)	1,2-Dimethylhydrazinium azide	299177-50-7	2928.00.90
Annex III (Iran)	2-hydroxyethylhydrazine nitrate; HEHN	N/A	2928.00.90
Annex III (Iran)	2-Nitrodiphenylamine	119-75-5	2921.44.00
Annex III (Iran)	3,6-Dihydrazino tetrazine nitrate; DHTN	N/A	2933.99.80
Annex III (Iran)	4,5-diazidomethyl-2-methyl-1,2,3-triazole; iso-DAMTR	N/A	2933.99.80
Annex III (Iran)	Acetyl ferrocene	1271-55-2	2931.90.00
Annex III (Iran)	Allylhydrazine	7422-78-8	2928.00.90
Annex III (Iran)	Aluminium powder	7429-90-5	7603.10.00
Annex III (Iran)	Beryllium powder	7440-41-7	8112.12.00
Annex III (Iran)	Boron carbide powder; B ₄ C	12069-32-8	2849.90.10
Annex III (Iran)	Boron powder	7440-42-8	2804.50.10
Annex III (Iran)	Bromine pentafluoride; BrF ₅	7789-30-2	2812.90.00
Annex III (Iran)	Bromine trifluoride; BrF ₃	7787-71-5	2812.90.00
Annex III (Iran)	Bromyl fluoride; BrO ₂ F	22585-64-4	2812.90.00
Annex III (Iran)	Butacene	125856-62-4	4002.20.00
Annex III (Iran)	Carboranes	N/A	2934.99.90
Annex III (Iran)	Carboxy-terminated polybutadiene; CTPB	N/A	4002.20.00

Annex III (Iran)	Catocene	37206-42-1	2931.90.00
Annex III (Iran)	Chlorine monofluoride; ClF	7790-89-8	2812.90.00
Annex III (Iran)	Chlorine pentafluoride; ClF ₅	13637-63-3	2812.90.00
Annex III (Iran)	Chloryl fluoride; ClO ₂ F	13637-83-7	2812.90.00
Annex III (Iran)	Cubane	277-10-1	2902.19.00
Annex III (Iran)	Decaborane; B ₁₀ H ₄	17702-41-9	2850.00.20
Annex III (Iran)	Dibutyl ferrocene	1274-08-4	2931.90.00
Annex III (Iran)	Dicyclohexyl ferrocene	N/A	2931.90.00
Annex III (Iran)	Dicyclopentyl ferrocene	125861-17-8	2931.90.00
Annex III (Iran)	Diethyl ferrocene	1273-97-8	2931.90.00
Annex III (Iran)	Diethylene glycol dinitrate; DEGDN	693-21-0	2920.90.70
Annex III (Iran)	Dihexyl ferrocene	93894-59-8	2931.90.00
Annex III (Iran)	Dihydrobenzvalene	287-12-7	2902.19.00
Annex III (Iran)	Diimido oxalic acid dihydrazine	3457-37-2	2928.00.90
Annex III (Iran)	Dinitrogen pentoxide; N ₂ O ₅	10102-03-1	2811.29.30
Annex III (Iran)	Dinitrogen tetroxide; N ₂ O ₄	10544-72-6	2811.29.30
Annex III (Iran)	Dinitrogen trioxide; N ₂ O ₃	10544-73-7	2811.29.30
Annex III (Iran)	Dipropyl ferrocene	N/A	2931.90.00
Annex III (Iran)	Ethyl ferrocene	1273-89-8	2931.90.00
Annex III (Iran)	Ethylene dihydrazine	N/A	2928.00.90
Annex III (Iran)	exo-tetrahydro-dicyclopentadiene	2825-82-3	2902.19.00
Annex III (Iran)	Ferrocene carboxylic acid	1271-42-7	2931.90.00
Annex III (Iran)	Guanidine nitrate	506-93-4	2925.29.00
Annex III (Iran)	Hydrazinium azide	14546-44-2	2825.10.00
Annex III (Iran)	Hydrazinium dinitrate	13464-98-7	2825.10.00
Annex III (Iran)	Hydrazinium diperchlorate	13812-39-0	2825.10.00
Annex III (Iran)	Hydrazinium perchlorate	27978-54-7	2825.10.00
Annex III (Iran)	Hydroxyl terminated polybutadiene; HTPB	69102-90-5	4002.20.00
Annex III (Iran)	Inhibited red fuming nitric acid; IRFNA	8007-58-7	2808.00.00
Annex III (Iran)	iso-propyl ferrocene	12126-81-7	2931.90.00

Annex III (Iran)	Magnesium >99.8%	7439-95-4	8104.11.00
Annex III (Iran)	Magnesium powder	7439-95-4	8104.30.00
Annex III (Iran)	Methylhydrazine nitrate	29674-96-2	2928.00.90
Annex III (Iran)	Mixed oxydes of nitrogen; MON _x	N/A	3824.99.96
Annex III (Iran)	Monomethylhydrazine dinitrate	N/A	2928.00.90
Annex III (Iran)	N,N-Diallylhydrazine	5164-11-4	2928.00.90
Annex III (Iran)	n-Butyl ferrocene	31904-29-7	2931.90.00
Annex III (Iran)	Nitrogen dioxide; NO ₂	10102-44-0	2811.29.30
Annex III (Iran)	Nitrogen trifluoride; NF ₃	7783-54-2	2812.90.00
Annex III (Iran)	Nitroguanidine	556-88-7	2929.90.00
Annex III (Iran)	n-Propyl ferrocene	1273-92-3	2931.90.00
Annex III (Iran)	Pentaborane-11; B ₅ H ₁₁	18433-84-6	2850.00.20
Annex III (Iran)	Pentaborane-9; B ₅ H ₉	19624-22-7	2850.00.20
Annex III (Iran)	Pentyl ferrocene	1274-00-6	2931.90.00
Annex III (Iran)	Perbromyl fluoride; BrO ₃ F	25251-03-0	2812.90.00
Annex III (Iran)	Perchloryl trifluoride; ClOF ₃	7616-94-6	2812.90.00
Annex III (Iran)	Perhydro-dinorbornadiene	66289-74-5	2902.19.00
Annex III (Iran)	Polybutadiene-acrylic acid; PBAA	N/A	4002.99.90
Annex III (Iran)	Polybutadiene-acrylic acid-acrylonitrile; PBAN	N/A	4002.99.90
Annex III (Iran)	PolyglycidylNitrate; Poly-GLYN or PGN	27814-48-8	3907.29.11
Annex III (Iran)	Polytetrahydrofuran polyethylene glycol; TPEG	N/A	3907.29.20
Annex III (Iran)	Quadricyclane	278-06-8	2902.19.00
Annex III (Iran)	Tetramethylhydrazine	6415-12-9	2928.00.90
Annex III (Iran)	Tricyclo[2.2.1.0(2,6)]heptane	279-19-6	2902.19.00
Annex III (Iran)	Triethylene glycol dinitrate; TEGDN	111-22-8	2920.90.70
Annex III (Iran)	Trimethylhydrazine	1741-01-1	2928.00.90
Annex III (Iran)	Trimethylolethane trinitrate; TMETN	3032-55-1	2920.90.70
Annex III (Iran)	Unsymmetrical dimethylhydrazine nitrate	N/A	2928.00.90
Annex III (Iran)	Zirconium (nuclear grade)	7440-67-7	8109.21.00 8109.31.00 8109.91.00

2.7 Explosives precursors

Since 2014, EU-wide rules on the marketing and use of explosives precursors were in place under Regulation (EU) No 98/2013 (⁽³⁹⁾). However, the threat from homemade explosives remained high and continued to evolve. It was therefore necessary to further strengthen and harmonise the system for preventing the illicit manufacture of homemade explosives. Regulation (EU) No 2019/1148 (⁽⁴⁰⁾) of the European Parliament and of the Council of 20 June 2019 on the marketing and use of explosives precursors was thus adopted, repealing Regulation (EU) No 2019/1148 with effect from 1 February 2021.

Although export controls are not explicitly mentioned in this regulation, it is restricted the access to, and the use of explosives precursors by, members of the general public. Notwithstanding that restriction, Member States were, however, able to decide to grant members of the general public access to those substances through a system of licences and registration.

The European Commission has developed guidelines (⁽⁴¹⁾) intended to assist Member States' national authorities, economic operators, and online marketplaces in the application of Regulation.

The regulation establishes two type of explosive precursors, those included in the Annex I and others in Annex II (see table 14 below).

Table 14. Description of the annexes to the Regulation (EU) No 2019/1148

Annex	Description
Annex I	Substances which shall not be made available to members of the general public on their own, or in mixtures or substances including them, except if the concentration is equal to or lower than the limit values set out below
Annex II	Substances on their own or in mixtures or in substances for which suspicious transactions shall be reported

2.8 Psychotropic and narcotic precursors (drug precursors)

The United Nations Convention against Illicit Traffic in Narcotic Drugs and Psychotropic Substances adopted in Vienna on 19 December 1988 is part of the worldwide effort to combat illegal drugs.

In the EU the implementation of the UN convention is governed by the regulation (EC) No 111/2005 (⁽⁴²⁾) and its amendments, which lays down rules for the monitoring of trade between the Union and third countries in certain substances frequently used for the illicit manufacture of narcotic drugs and psychotropic substances (drug precursors) for the purpose of preventing the diversion of such substances.

Recently, new chemical precursors have been added in the annexes of this regulation, by means the amendment (EU) No 2020/1737 (⁽⁴³⁾).

Drug precursors are scheduled in three categories as follows:

Table 16. Description of the annexes to the Regulation (EC) No 111/2005

Annex	Description
Category 1	It covers the most sensitive substances, from which illicit drugs can be produced most easily. Exports involving scheduled substances listed in Category 1 of the Annex, shall hold an export licence and also submit a pre-export notification to the competent authority.
Category 2	It covers less sensitive substances. Exports involving scheduled substances listed in Category 2 of the Annex, require a registration from EU authorities and, for certain destinations, require to submit a pre-export notification to the competent authority.
Category 3	It covers bulk chemicals that can have different types of uses in the manufacturing process. Exports involving scheduled substances listed in Category 3 of the Annex, require a registration from EU authorities and, for certain destinations, require to submit a pre-export notification to the competent authority.

3 Conclusions

Chemicals play a key role in our lives but if mishandled may also pose threats to health and security of the citizens. Many chemicals of daily industrial or personal use are also precursors of chemical weapons, or explosives.

For these reasons their use, transportation and of course export – object of this handbook - are controlled by a number of EU regulations, as well as treaties that all EU member states need to comply with.

The Handbook (2023 edition) follows the two previous editions of 2019 and 2021 which were met by a high interest by the public. The handbook has been downloaded thousands of times; requests came also to get the actual database, which we made available separately in the JRC Data Catalogue: <https://data.jrc.ec.europa.eu/collection/id-00344>

This third revision incorporates around 2000 chemicals, adding to the previous two more chemicals and references linked the restrictive measures against Russia amended in 2022 and 2023 as consequence of the invasion of Ukraine, plus, plus some dual-use chemicals not expressly mentioned in the control list, as well as changes on the Combined Nomenclature due to the entry into force of the 2022 Harmonized System.

All together, we are confident that the handbook helps the users to improve their export compliance by limiting the risk of mistakes and penalties by orienting themselves within the following collection of export regulations in force:

- Dual-use regulation, (EU) No 2021/821
- The Chemical Weapons Convention (International treaty)
- Chemicals with military applications, 2008/944/CFSP
- Hazardous chemicals, (EU) No 649/2012
- Chemicals included in the anti-torture regulation, (EU) No 2019/125
- Chemicals subject to sanctions for certain countries (Russia, Syria, DPRK and Iran)
- Chemical precursors of explosives, (EU) No 2019/1148
- Chemical precursors of psychotropic and narcotic substances, (EC) No 111/2005

We believe that this list of legislative references is comprehensive, but of course we are open to suggestions to include more relevant ones, as well as improve the handbook's readability and format. Contact email: jrc-strike@ec.europa.eu

As final disclaimer, we would like to underline that although this handbook contains around 2000 chemicals in the most comprehensive overview that we could provide, the fact that a chemical is not present in this handbook does not imply that is not under the scope of any export regulations. The handbook is meant to be a helpful guide, but its users are always due to consult the primary legislation and follow its requirements.

Table 13. Chemicals subject to the restrictive measures against Russia, (EU) No 833/2014.....	120
Table 14. Description of the annexes to the Regulation (EU) No 2019/1148.....	136
Table 15. Chemicals subject to the regulation on explosive precursors, (EU) No 2019/1148.....	137
Table 16. Description of the annexes to the Regulation (EC) No 111/2005.....	138
Table 17. Chemicals subject to the regulation on drug precursors, (EC) No 111/2005.....	139

GETTING IN TOUCH WITH THE EU

In person

All over the European Union there are hundreds of Europe Direct centres. You can find the address of the centre nearest you online (european-union.europa.eu/contact-eu/meet-us_en).

On the phone or in writing

Europe Direct is a service that answers your questions about the European Union. You can contact this service:

- by freephone: 00 800 6 7 8 9 10 11 (certain operators may charge for these calls),
- at the following standard number: +32 22999696,
- via the following form: european-union.europa.eu/contact-eu/write-us_en.

FINDING INFORMATION ABOUT THE EU

Online

Information about the European Union in all the official languages of the EU is available on the Europa website (european-union.europa.eu).

EU publications

You can view or order EU publications at op.europa.eu/en/publications. Multiple copies of free publications can be obtained by contacting Europe Direct or your local documentation centre (european-union.europa.eu/contact-eu/meet-us_en).

EU law and related documents

For access to legal information from the EU, including all EU law since 1951 in all the official language versions, go to EUR-Lex (eur-lex.europa.eu).

Open data from the EU

The portal data.europa.eu provides access to open datasets from the EU institutions, bodies and agencies. These can be downloaded and reused for free, for both commercial and non-commercial purposes. The portal also provides access to a wealth of datasets from European countries.

The European Commission's
science and knowledge service
Joint Research Centre

JRC Mission

As the science and knowledge service of the European Commission, the Joint Research Centre's mission is to support EU policies with independent evidence throughout the whole policy cycle.
